

IPAD CITY RALLY - RALLY GPS 2.0

[Link to meeting guide Berlin](#)

Keeping the position of the opposing groups always in sight, you start the hunt in teams looking for the different stations. Tasks on the iPad include taking photos, scanning QR codes, finding geocaches, answering questions, and mastering the active stations. The challenge can be adapted on request to company-specific content, and thus deal with a variety of topics. The start and the aim of the game can be arranged flexibly.
