

## Culinary Mission Statement

### **Our cuisine:**

The focus is on vegetarian and plant-based cuisine and reflects the colorful diversity of nature on your plates, using natural, sustainable products from primarily regional, preferably local producers and suppliers.

### **Our honesty:**

When it comes to fruit and vegetables, it is not possible for us to offer a completely regional range. Seasonality, regionality and a complete menu make a colorful mix of regions and countries necessary.

If meat, then selected products from our long-standing partners who guarantee a conscious decision on animal welfare and environmental protection. 100% from Germany.

If fish, then from sustainable, regional aquaculture and in close cooperation with our regional producers to protect the animals and the water. 100% from German water.

80% of our dairy products come from Germany and 100% from Europe.

### **Our promise:**

We guarantee freshness and quality.

We offer a wide, colorful and varied range.

We make sustainability simply delicious.

We satisfy the most demanding tastes.
